

HCF Care Continuum

Pre-Surgery Pre-Rehabilitation

After you have found a surgeon, scheduled a surgery date, read about the procedure and have talked to others, you may still have underlying questions and concerns. Successful results and a speedy recovery depends on much more than expert surgical care and opinions from others. When it comes to rehabilitation, the more you can do for yourself, physically, before surgery, the better your overall recovery will be!

“Fifty percent of outcome success is due to the surgeon, and the other fifty percent is due to the patient’s commitment to recovery – starting with Pre-Rehab.”
– Vonda Wright,

Pre-Rehabilitation is exercise therapy started at least six weeks before surgery. It’s a new concept to many; however, it has proven results and is making great impacts in the success of patient outcomes. Results include: patients becoming vertical sooner, faster recovery, faster function and pain stabilizing prior to surgery. So, don’t hesitate, get started today!

Post-Hospital Surgical Care and Rehabilitation

As leaders in post-hospital surgical care and rehabilitation, our programs offer comprehensive assessments and individualized treatment plans.

a tradition of caring

Post-Hospital Care, Redefined.

Care and Rehabilitation Centered Around You.

The proven end result is greater patient care and family satisfaction.

ReBound™ Diathermy™ Pain Management Products

Rebound Diathermy is a compact and portable heat therapy system. Soothing, deep tissue heat is delivered via comfortable, anatomically specific therapy garments (can cover small and large body areas). ReBound Diathermy can be used to treat virtually any condition where thermotherapy is indicated, including chronic pain, muscle spasms and joint contractures.

Revolutionizing Rehabilitation

In an everchanging health care environment, we provide the most comprehensive patient benefit programs. Our physical therapists are licensed, established, and specialized in orthopedics, neurologic, sports medicine and geriatric conditions. Our therapists attend mandatory continuing education courses throughout the year; guaranteeing the most updated knowledge and techniques to meet the needs of our diverse patient population.

To compliment our experienced therapy team, we’ve made valuable additions in rehabilitation devices offered, they include ReBound™ Pain Management Products and OmniVR™ Rehabilitation System. These proven devices include Electrical Stimulation, Patterned Electrical Neuromuscular Stimulation (PENS), Therapeutic Ultrasound and Shortwave Diathermy.

Administrative Support– Take Advantage of All Your Insurance Benefits.

Did you know?

- If your stay at the hospital is a minimum of 3 qualifying midnights, Traditional Medicare will pay 100% of your stay up to 20 days.*
- Today, there are several private insurances that offer the same 100% coverage without the 3 midnight qualifying stay minimum.

Our administrative staff is experienced not only with Medicare but many other private-insurances. Our professionals can assist you with this and much more.

*Must occur within 30 days of hospitalization of 3 or more qualifying days. This must be extension of the treatment for same condition requiring daily skilled nursing care.

HCF Redefined

The Difference

HCF “redefined” is a mind set focused around efforts in providing the best care possible in an environment that promotes quality of life. Starting with our traditional care practices and high standards we continuously enhance our individualized care plans and implement Person Centered Care values, thus taking patient care to the next level resulting in care of excellence.

Care and Rehabilitation Centered Around You

Person Centered Care

Person Centered Care represents our involvement in a worldwide cultural movement, supported by people and organizations, whom strive to provide care that enhances one’s surroundings, comfort and encourages quality of life.

Even for a short term stay with us, our *Person Centered Care* puts relationships at the forefront. By focusing on honoring and respecting the voice of our patients and those working closest with them, our care involves a continuing process of listening and changing efforts to individualize care—bringing joy, and the securities of home.

Specialized Therapy

Our proven physical (PT), occupational (OT) and speech therapy (ST) are provided by our full time on-site specialists. Working in our designated rehabilitation areas, therapists are readily available— daily, over weekends and on holidays. Highly individualized programs are designed to meet each patient’s specific rehabilitation needs. Therapy that is physician directed, begins under the constant supervision of a physical therapist. Here the professional care is administered respectfully, taking into consideration the patient’s emotional and physical well being.
